Our end-to-end Seafood Order Fulfilment

Fishing

Wild Catching

Fish are sustainably caught using methods like trawling, longlining, or seining, adhering to strict regulations to protect ecosystems and minimize bycatch.

Onboard Handling

The catch is brought onboard and preserved using ice, chilled seawater, or freezing systems to ensure freshness.

Landing

The catch is transported to a landing site. Quality checks are conducted to assess freshness and condition.

Sorting & Grading

Fish are sorted by species, size, and quality. Grading helps determine the market value and suitability for export or local sale.

Processing

Unloading Container

Thawing

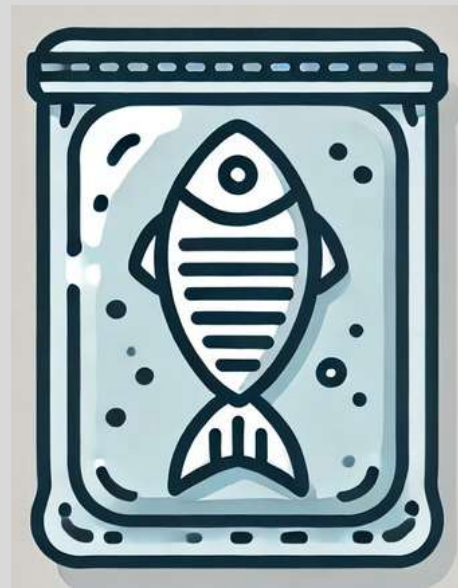

Filleting

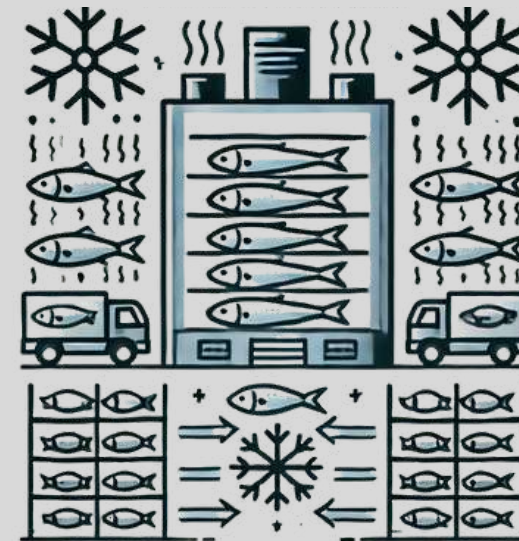

Protection Freezing
using Spiral Freezer

Packing into Box

Vacuuming

Drying in Air Blast
Freezer

10% Glazing
